Education

Amity University

Bachelor of Technology in Computer Science and Engineering (7th Semester)

Patna, Bihar

Expected 2027

CGPA: 6.21/10.0

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Compiler Design, Computer Networks.

KPS Memorial High School

Intermediate (Class 12th) – 62%

Patna, Bihar

2023

St. Karen's High School

Matriculation (Class 10th) – 72%

Patna, Bihar

2021

Technical Skills & Core Competencies

- **Languages:** JavaScript, Java, Python, HTML/CSS
- **Frameworks & Libraries:** React.js (Vite), Node.js, Express.js, Tailwind CSS
- **Databases:** MongoDB (Mongoose)
- **Tools & Technologies:** Git, GitHub, Docker, Docker Compose, Vercel, Render, Postman, Puppeteer, RESTful APIs, JWT
- **AI Integration:** Google Gemini API, Groq API (Llama-3 Models)
- **Management/Soft Skills:** Project Coordination, Event Logistics, Stakeholder Communication, Technical Documentation

Projects

AI Mock Interview Platform (Intervu)

Tech Stack: MERN Stack, Socket.io, Web Speech API, React Query, OpenRouter API

- Developed an interactive mock interview platform using browser-native Web Speech APIs (Synthesis and Recognition) to simulate spoken Q&A interview sessions.
- Implemented browser proctoring rules (focus-loss and tab-visibility tracking) featuring audio-spoken alerts and automated test submission on the 3rd violation.
- Integrated real-time Socket.io channels configured with a WebSocket-only transport layer to synchronize AI evaluation states with the client dashboard.
- Built robust server-side try-catch safety middleware and JSON parsers to handle OpenRouter API limits and content safety filter refusals gracefully.
- Designed a responsive glassmorphic React.js (Vite) interface implementing secure partitioned cookies (CHIPS) for safe cross-origin session storage.

AI Code Reviewer

Tech Stack: React.js, Node.js, Express.js, Gemini API (@google/genai), Axios, Prism.js

- Developed a full-stack code analysis application providing instantaneous, structured feedback on code quality (Bugs, Security, Performance, Clean Code) and complete refactored outputs.
- Integrated Google's Gemini models using the official @google/genai SDK and custom system instructions to enforce strict, education-first code review structures.
- Built a responsive React.js (Vite) frontend with a dynamic code editor featuring live syntax highlighting (prismjs & react-simple-code-editor).
- Configured CORS middleware, dynamic port binding, and environment variables to deploy the distributed application on Vercel (frontend) and Render (backend).

Extracurriculars & Achievements

- **Core Member, Club AIKYAM:** Spearheaded cross-functional project coordination, end-to-end event logistics, and stakeholder alignments for key departmental gatherings and tech community events at Amity University.
- **Problem Solving:** Consistently engaged in solving complex data structure problems focusing heavily on algorithmic paradigms like BFS, DFS, and Graph Theory in Java.
